ABOUT US

TRUSTED AND RECOMMENDED SINCE 1978

The Specialists Namibia, as a member of The Specialists Franchise Group (TSFG), is an industry leader in providing environmentally safe, reliable and superior pest control, cleaning and hygiene services in Southern Africa and beyond. This vision is at the very core of our commitment to protect our customer's health, food and property.

As custodians of pest management, The Specialists ensure peace of mind. There are three important reasons why you can entrust your environmental pest management to us:

- Our approach is first and foremost to understand your individual needs.
- We communicate with you before, during and after treatments to keep you informed.
- We partner with you to identify the cause – we do not just treat the symptoms of any pest infestation – we establish long-term solutions that focus on prevention.

MISSION

To provide an environmentally friendly and affective approach to pest control, cleaning and hygiene services that is reliable, effective and sustainable through monitoring Techniques as outlines in our Integrated Pest Management System (IPM) and achieve overall process excellence.

VISION

To be the most preferred pest control, cleaning and hygiene company providing integrated solutions to both residential, commercial & industrial properties that safeguard our environment, human health and provide peace of mind to our customers.

VALUES

- Committed to excellence in service delivery.
- Committed to sustainability of the environment and human health well-being
- To provide Innovative, Effective, Reliable, products and services that satisfy our customers needs.

PEST CONTROL SERVICES

Our complete Pest Control Services include the following:

INTEGRATED PEST MANAGEMENT

IPM is a smart, systematic approach to pest control that combines multiple strategies – including inspection, prevention, biological controls, and targeted chemical treatments – to manage pests effectively while minimizing risk to people, property, and the environment.

FUMIGATION

Fumigation is the process of using toxic gases or chemical agents to eliminate pests – including insects, rodents, and microorganisms – from a structure, storage facility, or transported goods.

PRE- and POST CONSTRUCTION TERMITE TREATMENTS

Pre- Construction treatments are the application of a protective barrier to pre-build houses and commercial buildings that stops termites from entering the premises. Post-construction is a remedial treatment applied to existing structures where termite prevention was not done during construction, or where an active infestation has been identified.

BIRD PROOFING

The safe removal of pesty birds and the installation of physical deterrents – such as spikes, netting, wire systems, and repellent gels – to prevent birds from roosting, nesting, or congregating on buildings and structures.

SNAKE REMOVAL

The safe and humane capture and relocation of snakes found in or around residential and commercial properties. In Namibia, where several venomous species are common, a snake encounter can pose a serious risk to people, pets, and livestock.

WEED CONTROL

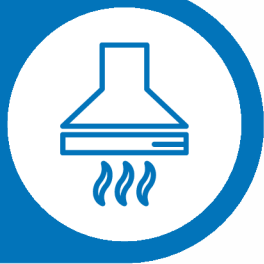

The systematic management and elimination of unwanted plant growth from properties, paved areas, gardens, and open land, Using a combination of herbicide application, preventative treatments, and ongoing maintenance programs.

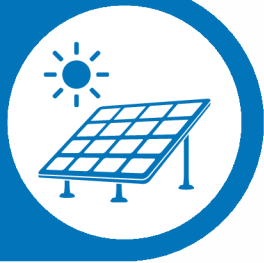

CLEANING SERVICES

Our Cleaning Services include the following:

EXTRACTOR / CANOPY CLEANING

The thorough degreasing and cleaning of kitchen extraction systems – including canopies, filters, ductwork, and extractor fans – found in commercial kitchens, restaurants, and food processing facilities. Grease buildup in these systems is one of the leading causes of commercial kitchen fires and is a serious health and hygiene risk. Regular professional cleaning ensures your extraction system functions efficiently, keeps your kitchen compliant with health and safety regulations, and significantly reduces the risk of fire – protecting your staff, your customers, and your business. **(SANS 1850:2012, NFPA 96)**

SOLAR PANEL CLEANING

Our professional solar panel cleaning team is your direct path to maximizing your energy savings. Dirt, dust, and grime can reduce your panels' efficiency by as much as **25%**. By safely and expertly removing all buildup with specialized, streak-free equipment, we restore your system to peak performance.

GREASE TRAP CLEANING

the professional removal and disposal of accumulated fats, oils, and grease (FOG) from grease traps and interceptors in commercial kitchens and food service facilities. Grease traps prevent FOG from entering and blocking the municipal drainage system, but require regular cleaning to function effectively. A neglected grease trap leads to foul odours, drainage blockages, pest attraction, and potential health code violations. Our professional cleaning service keeps your grease trap functioning optimally, ensures regulatory compliance, and maintains a hygienic environment for your business.

HYGIENE SERVICES

Our Hygiene Services include the following products which we also install, maintain and replenish:

SOAP & FOAM DISPENSERS

TOILET ROLL DISPENSERS

HYGIENE BAG DISPENSERS

AUTOMATIC HAND DRYERS

PAPER TOWEL DISPENSERS

and many more....
